DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-17, drawn to a subcombination, classified in class 4, subclass 249.
 - II Claims 26-28, drawn to a subcombination, classified in class 4, subclass 252.1
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I discloses a discharge valve for discharging waste through an outlet, a nozzle assembly, and an electrical control system for operating the discharge valve and the nozzle assembly. Invention II shows a mounting assembly for connecting a toilet bowl to a floor. All inventions have separate utility and are independently usable in a toilet system in absent any one of the other subcombinations. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to the applicant on 02/19/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huyen Le whose telephone number is 703-306-5504. The examiner can normally be reached on Monday-Friday from 9:00 am to 5:00 pm.
